# Automated CIS compliance with Veltar.

Compliance that understands Apple.

Manual compliance check is outdated. Checklists, custom scripts, and reactive fixes don't stand a chance in a zero trust environment. With Scalefusion Veltar, CIS compliance for macOS, iOS, and iPadOS is built right into your UEM, automated, native, and always-on.

When compliance breaks, every risk follows.

Increased vulnerabilities

Exposed Apple endpoints create easy pathways for malware, exploits, and data theft.

Audit failures and penalties

Missed benchmarks can trigger legal, regulatory, and reputational damage.

Operational disruptions

Manual fixes cause IT burnout and unplanned downtime.

Fragmented visibility

Without real-time compliance insights, security blind spots multiply.

Put compliance on autopilot with Veltar.

95+ prebuilt CIS rules

Out-of-the-box CIS Level 1 and Level 2 benchmark enforcement for Apple platforms—no scripting needed.

Automated monitoring & remediation

Get real-time compliance visibility. Detect and fix issues instantly to keep Apple devices secure and audit-ready.

Customizable policies

Adjust benchmarks based on your internal security posture and compliance strategy.

Audit-ready dashboards

Track, report, and prove compliance in just a few clicks with no manual effort.

ITOps and SecOps convergence.

Built for IT, approved by security.

- ✅ Set it, forget it, and focus on scale.

- ✅ Get visibility into every device's state. Act before gaps turn into risks.

- ✅ Be audit-ready before the auditors even ask.

How it works?

4-step workflow

01 — 02 — 03 — 04

Enable compliance monitoring

Turn on compliance automation from the dashboard.

Apply benchmarks

Select CIS Level 1 and Level 2 policies for Apple devices.

Scan and detect risks

Detect issues flagged in real time.

Auto-remediate

Fix problems instantly or notify IT for action.

Trusted by regulated industries.

BFSI   Education   Logistics   Healthcare   Retail

Start your compliance-first Apple strategy.

No patchwork tools. No surprises.
