

ChromeOS: Simplified and Supercharged with Scalefusion

Seamless Administration. Intuitive Control. Reliable Security.

Scalefusion for ChromeOS is Here

With Scalefusion's ChromeOS management, streamline and monitor ChromeOS device performance, security, and configuration through a single, intuitive dashboard. Experience a seamless management process that integrates effortlessly into your daily IT ops, enhancing efficiency and enabling a higher level of control. Transform Chromebook management - from a routine task into a strategic advantage, and drive success with a platform designed to support innovation and operational excellence.

Your ChromeOS Powerhouse: Scalefusion

From classrooms to retail floors and manufacturing lines, Scalefusion helps you unlock the full potential of your ChromeOS devices. Whether you are managing Chromebooks for educational purposes, deploying digital signage in retail, or optimizing operational efficiency on the factory floor, Scalefusion delivers streamlined control and seamless management.

Make every device count with Scalefusion's intuitive platform, tailored for diverse industry needs. Elevate your device management strategy and turn your ChromeOS devices into powerful tools for success.

Maximize Your ChromeOS Devices with Precision

Centralized Management Console

Manage all your ChromeOS devices from a single, user-friendly interface. Deploy updates, enforce policies, and monitor compliance in real time, regardless of your fleet's size or location.

App & Web Access

Effortlessly distribute apps from the Google Play Store or custom enterprise apps. Control web access to maintain a secure, productive online environment for users.

Kiosk & Managed Guest Sessions

Turn any ChromeOS device into a dedicated device with kiosk mode. Enable managed guest sessions for shared device use without compromising security.

Custom Policy Creation

Create tailored policies to meet the specific needs of your organization. Control everything from network settings to peripheral access.

Reliable OS Update Management

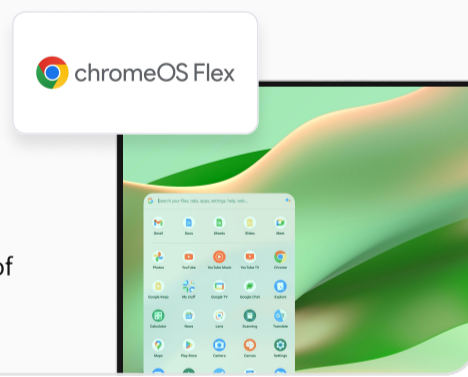

Ensure that your devices are always running the latest version of ChromeOS. Schedule and push updates remotely, minimizing downtime.

Shared Device Mode

Perfect for organizations with shared workstations or loaner devices, manage multiple user profiles on a single device without sacrificing security or performance.

Breathe New Life Into Existing Devices

Convert existing machines into powerful ChromeOS devices with ChromeOS Flex and manage them on Scalefusion. Reuse your Windows and macOS devices without retiring them prematurely, and extend the life of your devices with Scalefusion for ChromeOS.

The Scalefusion Difference

Dashboard Designed For You

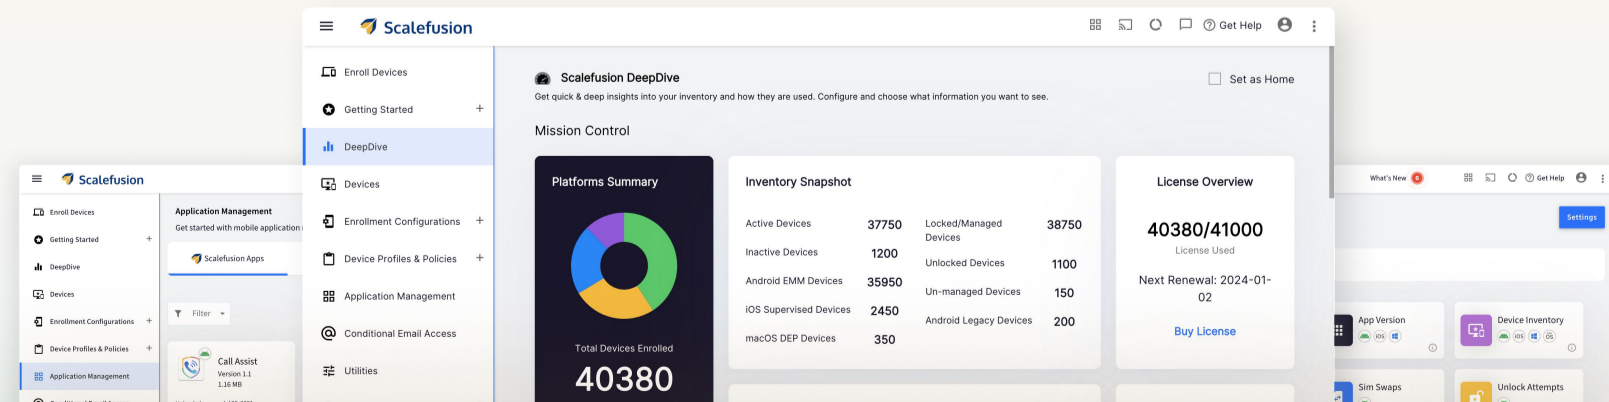

We believe power comes from simplicity- Our clutter-free dashboard makes it extremely easy to manage your endpoints making day-to-day operations simple.

24/6 Complementary Support

Where you can reach out to our team, who will answer all our queries no matter what time zone you're in. Our median response time stands at an average of less than 5 minutes.

Smooth Migration & Setup

We offer complete migration assistance to help you move from your current solution to Scalefusion UEM with confidence and ease. Just make the choice to migrate and leave the rest to us.
