Scalefusion

The 360° IT for your enterprise.

A unified plan that brings device management, access, and security together in one platform.

One platform. Three products. Seamless experience.

Scalefusion
Endpoint Management

oneLogin
Zero Trust Access

Veltar
Compliance & Security

Three layers, One seamless experience.

Endpoint management built for everyday operations.

Manage endpoints from a single platform, keeping configurations consistent, apps up to date, and operations running without manual effort.

- Application management
- Kiosk Mode
- Location tracking
- Remote commands
- Content management

Secure access that works the right way.

Ensure every login is verified, every session is trusted, and access stays aligned with both user identity and device context.

- Single sign on
- Multi-factor authentication
- Endpoint authentication
- Just in time admin

Security that stays on, without slowing you down.

Keep endpoints aligned with your security standards through continuous checks and automatic actions, so risks are addressed before they become issues.

- Automated endpoint compliance
- Web content filtering
- Secure web gateway solution

The power of everything working together.

Pros	Cons
• Everything stays aligned across devices, access, and security	• Systems operate in silos, creating gaps
• Faster rollouts with fewer manual dependencies	• More time spent on manual fixes and coordination
• Consistent operations across teams and locations	• Inconsistent configurations across environments
• Access decisions backed by real-time context	• Access and device state don't always align
• Continuous security without constant follow-ups	• Security remains reactive and harder to maintain

One plan. One price. Everything aligned.

Scalefusion 360 Enterprise is available at $12.42 per device/month (billed annually).Just one unified plan covering deployment, access, compliance, and security, under a single subscription.

$12.42
per device/month

Built for consistency across every platform.

macOS · chromeOS · Windows · android · debian

How things work with Scalefusion 360 Enterprise.

Scalefusion 360 Enterprise brings together device management, access, and endpoint security into a single, connected flow. Devices are set up with consistent configurations, access is granted based on real-time context, and security stays aligned as operations scale.

Trusted across teams, regions and industries.
