

# Zebra printer management that speaks for itself.

Centralize monitoring, configuration, and maintenance of your Zebra printers with Scalefusion. Ensure high performance, security, and efficiency across your enterprise, without manual intervention.

## Supported Zebra printer models.

ZTC ZD421  
203 dpi & 300 dpi, ZPL

ZTC ZD621  
300 dpi, ZPL

ZTC ZQ630 plus  
203 dpi, CPCL

Additional models  
Any Zebra printer compatible with MQTT

## When printer errors go untracked.

- Multiple printers across locations run with inconsistent settings or outdated firmware.
- Limited visibility into printer usage, error logs, and maintenance status.
- Firmware updates and device troubleshooting take too much time.
- Security and operational policies are hard to enforce uniformly.

## Clear insights without translation errors.

### Device profiles & policies

- Configure print mode, speed, density, and media type.
- Set label length, width, margins, and tear-off position.
- Manage reset button, system logs, and printer language.
- Adjust sleep mode, shutdown timing, and battery LED.
- Manage Bluetooth discoverability and energy mode.

### Real-time communication using MQTT

- Enable lightweight, secure communication between printers and Scalefusion MDM.
- Remotely monitor device health, push settings, and firmware updates in real time, regardless of location.

### Centralized device management

- Monitor printer status, connectivity, battery, firmware, usage metrics, and health in real time.
- Group devices with profiles to apply consistent policies across multiple printers.
- Track print counts, media usage, maintenance cycles, and error logs from a unified dashboard.

### Firmware Over-The-Air (FOTA)

- Remotely deliver and install firmware updates.
- Ensure printers run the latest features, security patches, and performance improvements.
- Available on Enterprise license plans (2023 & 2025).

### Device inventory & insights

- View detailed metrics: memory, battery, firmware, network info, print odometer, and custom properties.
- Get printer status: Managed, Unmanaged, or Inactive.
- Use customizable dashboards for quick device and performance overview.

We're safe. You're secure.
